Socialising with friends and family, playing football, reading books, cycling bicycle, computing and also traveling.

ABOUT ME

At the moment I am studying on the GoIT course, specializing in Full-Stack Developer. The training provides a lot of tech-skills practice, participation in team projects and IT English. At this stage, I am completing the Javascript and React course and now studying Node JS. My goal is to become a Middle Front End Developer in two years. Open to internships and vacancies for junior.

PROJECTS

Event Booster [HTML5, CSS3, JS, Webpack] An application for finding actual events in the world.

The Founder [JavaScript] An application to search for a picture by name.

Phonebook [React] Application with authorization, where you can save your contacts.

Ice-cream [HTML5, CSS3, Parcel] A website with a responsive layout.

Web Studio [HTML5, CSS3] A website with a responsive layout.

WORK EXPERIENCE

Internship from the university agricultural practices

May 2019 - December 2021 | Denmark

Since this is not related to the IT profession, I describe the lessons my practice has taught me:

Adaptation to a new environment.

Willingness to take on any challenge

Daily communication in English.

Design engineer

June 2017 - December 2018 | Ukraine

Draw details car using Compas 3D and SolidWorks.

Monitoring and updating of documents.
